### **DETAILED ACTION**

1. This action is responsive to the applicant's communication filed 6/15/2006.
2. Claims 1-27 have been elected without traverse, and claims 28-36 withdrawn.
3. Claims 1-27 are pending and presented for examination.
4. Claims 28-36 withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected election, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on June 15, 2006.

### ***Information Disclosure Statement***

5. The information disclosure statement (IDS) submitted on February 26, 2004 is in compliance with the provisions of 37 CFR 1.97. Accordingly, it has been placed in the application file. The information referred to therein has been considered as to the merits.

### ***Double Patenting***

6. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference

claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

7. Claims 1-27 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-39 of copending Application No. 09/455,877. Although the conflicting claims are not identical, they are not patentably distinct from each other because claims 1 and 6 of the instant application 10/677,113 are broader than claims 2 and 17 of copending application No. 09/455,877. Claim(s) 2 and 17 of application No. 09/455,877 contain(s) every element of claim(s) 1 and 6 of the instant application and thus anticipate the claim(s) of the instant application. Claim(s) of the instant application therefore is/are not patently distinct from the earlier application claim(s) and as such is/are unpatentable

Art Unit: 2165

over obvious-type double patenting. A later patent/application claim is not patentably distinct from an earlier claim if the later claim **anticipated by** the earlier claim.

“A later patent/application claim is not patentably distinct from an earlier patent/application claim if the later claim is obvious over, or **anticipated by**, the earlier claim. In re Longi, 759 F.2d at 896, 225 USPQ at 651 (affirming a holding of obviousness-type double patenting because the claims at issue were obvious over claims in four prior art patents); In re Berg, 140 F.3d at 1437, 46 USPQ2d at 1233 (Fed. Cir. 1998) (affirming a holding of obviousness-type double patenting where a patent application claim to a genus is anticipated by a patent claim to a species within the genus).” ELI LILLY AND COMPANY v BARR LABORATORIES, INC., United States Court of Appeals for the Federal Circuit, ON PETITION FOR REHEARING EN BANC ( DECIDED: May 30, 2001).

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

### ***Claim Rejections - 35 USC § 101***

8. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

9. Claims 16-27 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claims 16-27 appear to be directed to an abstract idea rather than a practical application of the idea, since no tangible result appears to occur. The display routine step is neither applied in a disclosed practical application nor made available for use in a disclosed practical application

Art Unit: 2165

so as to constitute a tangible result. Instead, it appears to be just a thought because the display routine configured to be executed on the processor to display the relationship connection on the display device is not producing a tangible result. Thus, the claims cannot be placed in one of four categories of an invention. Therefore, they are rejected under 35 U. S. C. 101 as being non-statutory.
